

Smart Board

Briefly about the main things

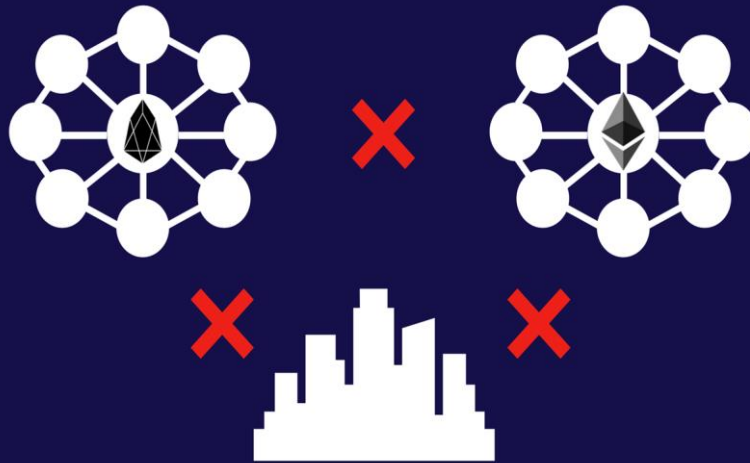

| PROBLEM THAT WE SOLVE

Today, the financial blockchain infrastructure **does not allow using crypto assets** as a convenient business tool

| WHAT IS WRONG?

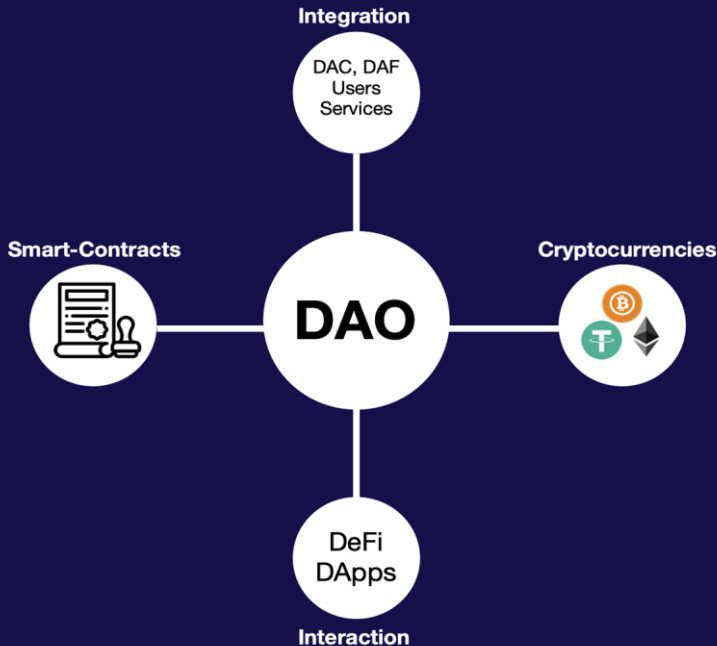

Different blockchains operate only within their network, **without interacting** with each other

Unique features of smart contracts **are not available** to average users due to the complexity of interfaces and numerous “workarounds”

| OUR PRODUCT

SmartBoard – a platform for creating decentralized autonomous organizations (DAOs), which allows **managing different digital assets** easily and conveniently

1

All decisions in organizations made according to predetermined rules

2

Actions are regulated by smart contracts that can be configured through a user-friendly interface

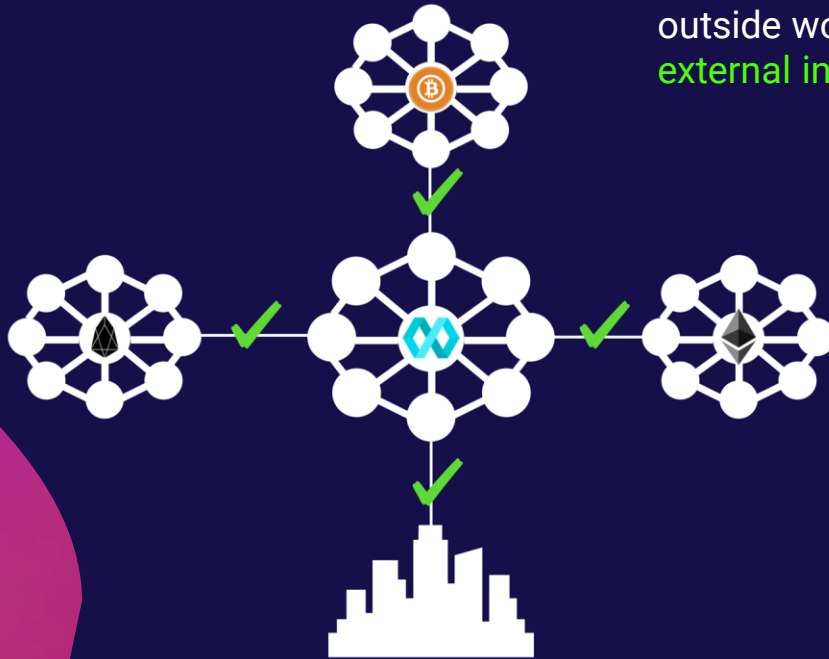

3

Everything is performed without a single line of code, external layers, or apps

| SMARTBOARD ECOSYSTEM

SmartBoard is the **first full-fledged platform** for financial interaction between different blockchain ecosystems

Turing-complete smart network contracts can interact with the outside world and **connect external infrastructures**

| WHAT IS OUR ADVANTAGE?

Wide **target audience**:
traders, investors,
holders of crypto
assets, funds,
corporations,
government agencies

DAO Wallet is a universal
tool for **collective
management of finances**
and investment activities

Issuance of crypto
shares and fundraising
through **an internal
exchange** on the most
transparent terms

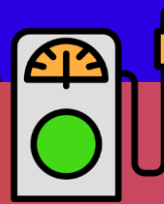

The finished **prototype**
platform is the best proof of
the seriousness of our
intentions

| FINANCES

Single token for all internal services payments — **SmartBoard Coin (SBC)**

Internal platform services burn SBC, maintaining **stable deflation level** and asset rate

Services — the most profitable of which will be **the crypto exchange** — will generate the main income in the system

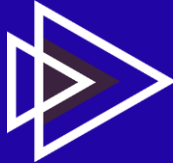

Gradual development of infrastructure for DAO will lead to new opportunities for **monetization**

CRYPTO MARKET OVERVIEW

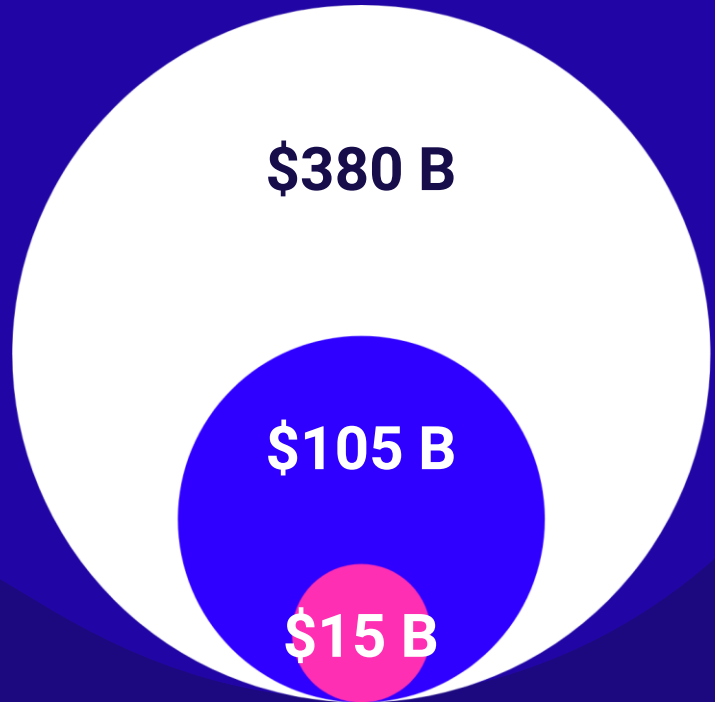

Total digital asset market capitalization

Volume of daily digital assets turnover

DeFi Market volume

GROWTH DYNAMICS

Growth of successful cryptoprojects

We estimate the growth of our project realistically – we expect **high performance** but predict the average result

Expected growth of SmartBoard tokens price –

10 000 %*

* Our forecast is justified. More details can be found in [the Investment Memorandum](#)

We invite you to explore
the Investment Memorandum
thoroughly and become our partner
at an early stage

Thank you

for your attention
